Model **TBC-1T-PBW BIN WASHER** is a fully self contained system that efficiently and thoroughly washes 1 ton and 1/2 ton picking bins inside and out. The system removes field debris, dirt, grape, and sugar residue. The system is modular and portable to facilitate off season storage. The modular design enables tailoring the system to interface with existing grape delivery equipment/systems and processes. The innovative design delivers outstanding cleaning results, minimizes water consumption and waste water generation.

The **TBC-1T-PBW** modular design allows for incrementally adding more system capability as required. The basic system modular components are: bin loading section, bin inverter section, single pass bin washing section, bin re-inverter section, bin stacking section, final accumulation section, and bin load out section. These sections are fully automated and designed to work together in combinations to suit the requirements.

We take great pride in designing and manufacturing the best washing equipment available to the agricultural industry. Our robust machinery is constructed of stainless steel and built to deliver years of trouble free service.

TBC-1T-PBW OPTIONS:

- Elevators
- Inverters
- Stackers
- Accumulators
- Water Recycling
- Hot Water and Ozone Compatibility

PROUDLY BUILT IN THE U.S.A.

1/2 & 1 TON BIN WASHING SYSTEMS
